Air Pollution

United Kingdom

Air pollution knows no borders

In 2010 **air pollution**** in **the UK** caused:

#cleanair

*Total amount of Particulate Matter (PM) precursors SO₂, NO_x and NH₃ deposited or emitted in the country in 2012. PM are tiny, very harmful particles which can be formed by other pollutants (precursors). Source: EMEP Status Report 1/2014.

**From PM_{2.5} (fine particles) and ozone. Source: European Commission Impact Assessment on Clean Air Policy Package.
